This survey is intended to serve two general purposes. First, we would like to offer LYRASIS members and participants in the broader GLAM (galleries, libraries, archives and museums) community a new perspective on how accessibility is embedded in our work with collections and systems. Second, we would like to understand how we can better serve LYRASIS members/users in terms of the accessibility requirements of our products, services, and platforms. We appreciate your taking the time to answer this survey in order to achieve the broadest possible response from GLAM institutions of all shapes and sizes.

The survey is divided into three sections concerning three different areas of responsibility: purchasing content, creating content, and purchasing systems. Most survey respondents will only be responsible for one or two of these areas within their institution. For any areas that you are not responsible for, please indicate "no" in the survey question, and you will be taken to the next section of the survey.

Please feel free to share the survey with your colleagues for questions outside your job duties. We realize multiple responses from one institution may be necessary.

At the beginning of the survey you will be asked for your name, institution and job title. All of this information will remain confidential, and will not be included in any external publications/reports or presentations. We are merely using this information to identify duplicate entries across our distribution channels.

The deadline for participation is March 1, 2019.
